Report regions

Four regions stay separate. ML never rewrites a deterministic finding.

Observed facts

2 flows, 0 sessions, 2 handshakes, 0 certificates.

Deterministic conclusions

1 session findings, 1 endpoint findings, 15 applicable checks.

Advisory / ML

1 advisory items. Not used as compliance judgments.

Analyst conclusions

No analyst notes attached to this export.

Capture limitations

Assessment state **limited**. Unknown and not-observable checks are coverage, not a clean bill of health.

INCOMPLETE FLOWS

CONFLICTING FLOWS

2

NOT-OBSERVABLE CERTS

- Truncated packets present: **False**
- Unknown checks: **1**
- Not-observable checks: **0**
- 2 handshake(s) have certificates that are not observable.

Coverage denominators

Pass / fail / unknown / not-observable always sum to applicable. Unknown is never folded into pass.

Prioritized findings

TLS_FORWARD_SECRECY_INDETERMINATE · Forward secrecy indeterminate

informational IND Indeterminate Score 9 · 172.18.0.2:4433

PSK-only resumption or missing handshake evidence cannot prove forward secrecy from one PCAP.
